

OAK SOLUTIONS

group

June 19, 2008

To Whom It May Concern,

Oak Solutions Group is a producer and marketer of ēvOAK premium oak alternatives. The product line consists of American and French oak. Both oak types receive open air seasoning, and when specified, toasting by three different methods. There are no chemicals used in the production or preservation of the products. Furthermore, Netamycin has not been used to treat our products. This letter is to serve as proof that Oak Solutions Group, and parent company Independent Stave Company, uses chemical-free oak for the products they produce and sell.

Sincerely,

A handwritten signature in black ink that reads "David Llodrá".

David Llodrá,

Research & Development Director
