

OAK SOLUTIONS
group

NO CHEMICAL USE

July 1, 2015

To Whom It May Concern,

Oak Solutions Group is a producer and marketer of ēvOAK premium oak alternatives. The product line consists of French and American oak. There are no chemicals used during seasoning of French and American oak. Both oak types receive open-air seasoning, and when specified, toasting by three different methods. Furthermore, Netamycin has not been used to treat our products. This letter is to serve as proof that Oak Solutions Group, its parent company Independent Stave Company and all of its direct subsidiaries do not use chemicals during seasoning of French and American oak products.

Sincerely,

David Llodrá

R&D Director
